SKILLS

- Javascript, HTML, PostgreSQL, Node.js, React, CSS
- Self-starter, Efficient, Outstanding interpersonal and Motivational
- Microsoft Office: Word, Excel, Access and Powerpoint

PROJECTS

Simple 21

Developed a web based game app that allows users to play against the computer. The web app allows users to draw cards, hit or stay, draws cards for the computer. Whoever scores 21 or is closer to 21 wins.

- Created using HTML for the framework
- CSS to style the page
- Javascript and HTTP Request to fetch data from the Deck of Cards API via axios and the game functionality

Shutter

Shutter is a social media web app that concentrates in sharing high quality snapshots of our users interests and experiences.

- Completed in two weeks as a small group project with role as the PR Review Chief
- Built front-end using HTML, CSS, and React.
- Developed back-end using Express and Postgres, and Node.js.
- Reviewed code and ensured we had minimal merge conflicts and set rules on code approvals before merging

Movie Review Web App

Executed a web app that allows users to select a movie, view selected movie's release date, gets a description of selected movie and review each movie.

- Built using Javascript, HTML
- Used HTTP Request to fetch data from the Studio Ghilbil API via fetch
- Designed the front-end using CSS
